

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

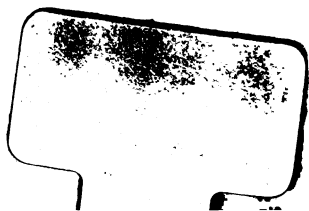

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

STERLING
EXCHANGE TABLES.

9.

THE NEW
Sterling Exchange Tables,

FOR

CONVERTING AMERICAN CURRENCY AND GOLD

(From 1 Cent to 1 Million Dollars)

INTO

STERLING MONEY,

(Based on the Decimal System, with special
arrangement to ascertain the
Sterling Exchange.)

BY

CHARLES MOESCH.

ENTERED AT STATIONERS' HALL.

LIVERPOOL:

PRINTED BY ROCKLIFF BROTHERS, 44 CASTLE STREET.

1874.

232 . 9 . 292 .

The following Tables may be ordered through—

BRYAN CORCORAN, WITT & CO.

28 Mark Lane, London.

ROCKLIFF BROTHERS,

44 Castle Street, Liverpool.

THOMAS MURRAY & SON,

49 Buchanan Street, Glasgow.

McGLASHAN & GILL,

50 Upper Sackville Street, Dublin.

**Reduction Tables for the Foreign Grain & Flour
Trade. Price £1 1s.**

For converting the Quotations of any Grain-Exporting Country into their English Equivalents, whatever the Exchange, Money, Measure, Weight, or Article may be.

**Comparative Tables of the Grain and Flour Prices
of the United States of America, Canada and
England. Price 5s.**

**English Equivalents of Grain and Flour Prices,
for every Weight customary in the United
Kingdom. Price 6d.**

**Comparative Table of the Old and New Sterling
Exchange. Price 6d.**

This Table enables those who have Cotton, Grain or General Tables, framed on the Old Exchange, to use them as heretofore.

EXPLANATION.

A few examples, how to convert American Gold and Currency into Sterling Money, with help of the present Tables, will prove to be the best explanation that can be given.

To convert Gold into Sterling.

Say 5745\$ 27c. at the Exchange of 4\$ 82½ P £.

Look to the bottom of the pages, and find the page with

Sterling Exchange 482½,
and referring to the part headed

Dollars into Sterling,
place below

\$5745 27c.

£1036 269	for the	5000\$
145 078	"	700
08 290	"	40
1 036	"	5
041	"	20c.
15	"	7

Add £1190 729, reading the fraction $\frac{729}{1000}$
as 7 florins 29 hundredths, or 14 shillings 7 pence.

The nine rows of figures give the corresponding values of 1 to 9\$ in £ and decimal fractions, and it is evident that if

1\$ is equal to	£	0	$\frac{2072539}{1000000}$
10\$ are	"	£	2
100\$ "	"	£	20
1000\$ "	"	£	207
10000\$ "	"	£	2072

The rule, therefore, is to place the first figure, 0 or 1, under the corresponding number of dollars or cents, units under units, tens under tens, hundredths under hundredths, &c., and to let follow the other figures as far as three fractionary figures, representing—the first florins—the other two hundredths parts of florins—

25	of which are equal to	6d.
50	„	1s.
75	„	1s 6d.

To convert Currency into Sterling,
say 3565\$ 75 cents, with Exchange quoted 4\$ 85c. per £, and Gold at 111½. Place your thumb against 485 of the outside column headed *Exchange* of any one page, and letting the leaves slip from under your thumb until you come to the page on which alongside 485 you will find, in the column headed *Gold*, the figures 111.55, which is the nearest to 111½—convert the 3565\$ 75c. at the *Sterling Exchange* 541, marked at the bottom of the same page, as explained before, say—

£0554	529	for	3000\$
092	421	„	500
11	091	„	60
0	924	„	5
	129	„	70c.
	09	„	5

Add £659 103, reading the fractions as 1 florin 3 hundredths, or 2 shillings ¾ pence.

Observe that in the column *Gold* the fractionary per-centage is quoted in hundredths instead of by

eighths, fourths and halves, and bear in mind that

$$\begin{array}{ccccccc} 12\frac{1}{2} & 25 & 37\frac{1}{2} & 50 & 62\frac{1}{2} & 75 & 87\frac{1}{2} \end{array}$$

$$\text{Equals } \frac{1}{8} \quad \frac{1}{4} \quad \frac{3}{8} \quad \frac{1}{2} \quad \frac{5}{8} \quad \frac{3}{4} \quad \frac{7}{8}$$

and that it is requisite to find always the figures that approach nearest to these fractions.

This method of converting Currency into Sterling, based on the multiplication of Exchange and Gold, is the shortest and the one adopted *in all business transactions*, but it is *not* the correct one. There necessarily must nearly always be a slight difference, amounting, in some instances, to $\frac{1}{4}$ cent per £. The reason why it is used, nevertheless, is that it is the shortest way, and that it cuts both ways, the difference being at one time in favor of the American merchant, at another time against him. Thus, 482 Exchange and $111\frac{1}{4}$ Gold give in reality $536\frac{225}{10000}$, but 536 Sterling Exchange is adopted, while $482 \times 111\frac{3}{8}$ gives $536\frac{8275}{10000}$, and 537 Sterling Exchange is quoted.

The correct way is to convert Currency into Gold by the quotation of the Gold premium, and then Gold into Sterling by the quoted Exchange.

In large monetary transactions, and where great exactness is required, this method ought to be adopted, and to meet this requirement, the upper part of the pages, headed

Currency into Gold,

has been added, and referring to the Second Example, the following is the way to convert the 3565\$ 75c.

Currency. Find the page headed

Gold 111½,

and place below

3565\$ 75 Currency.

2690	58	for the	3000\$
448	43	„	500
53	81	„	60
4	48	„	5
	63	„	70c.
	4	„	5

Add 3197\$ 97 Gold.

Convert same by page 485.

Dollars into Sterling.

£0618 557	for the	3000\$
020 619	„	100
18 557	„	90
1 443	„	7
186	„	90c.
14	„	7

Add £659 376, and read the fractions as 3 florins 76 hundredths, or 7 shillings 6¼ pence, which shows a difference of 5/5½ from the shorter, but less correct way in general use.

The addition of this part of the book will compensate for the absence of Tables to convert Sterling Money into Dollars, Gold, and Currency, which is so simple a calculation that Tables can fitly be dispensed with.

Example.—Convert £659 7s 6¼d into Dollars, Gold, and Currency, at Exchange 485, and Gold 111½.

Write **£659 376**, multiply by 485.

3296880
5275008
2637504

319797360

Throw away the last three figures, and you have

3197\$ 97 **Gold.**
 Add $11\frac{1}{2}\%$ $\left\{ \begin{array}{r} 319 \quad 80 \\ 31 \quad 98 \\ 15 \quad 99 \end{array} \right.$

Giving 3565\$ 74 **Currency.**

Or adopting the short way—

$\text{£}659 \ 376 \times 541 = 3567\$ \ 22$

Showing the difference of 1\$ 48c.

In conclusion, a word about the **Comparative Table of Old and New Sterling Exchange.**

The existing Tables for the Conversion of Quotations of Grain, Cotton, and General Goods, have become useless by the alteration of the Quotation of Exchange, but the *Comparative Table*, giving the Old alongside the New Sterling Exchange, will enable those who have such Tables *to use them as heretofore*. They have merely to ascertain by said Table the Old Exchange, and then convert it by referring to the Tables in their possession.

I trust that the above explanation will be found sufficiently clear to enable any one to use the present Tables.

C. MOESCH.
